#### POHISIORD

This report was prepared by Professor Shanti S. Gupta on Contract

AF 33(657)11737 for the Aerospace Research Laboratoriez, Office of Aerospace

Research, Unites States Air Force. This report gives the list of publications

which were partially supported under the above contract during the period

July 1963-September 1966. This contract was munitored by Dr. P.R. Krishnaiah

of the Applied Mathematics Research Laboratory, ARL.

#### ABSTRACT

This report gives a list of publications which were partially supported under the Contract AF 33(657)11737 during the period July 1963-September 1966.

Research on ranking and selection procedures for the univariate and multivariate populations has continued apace during this period. Several associated problem: If distribution theory relevant to selection and ranking problems have and been investigated. In this latter category fall the problems of distribution of the maximum of several correlated random variables and, more generally, the distribution of order statistics or a linear function of them. The application of order statistics to estimate the parameters of the logistic and the multivariate normal distribution has also been made (see nos. [7, 8, 9, 10, 24, 13, 15] in the attached list). Almost all other papers in the attached list deal with the selection and ranking problems directly. Two Ph.D. students were partially supported on this contract. Both these students finished their Ph.D. under Professor Gupta, J. Deely in 1965 and Mrs. M. Gnanadesikan in 1966.

List of Publications which were partially supported under the Aerospace Research Laboratories Contract AF 33(657)11737

- 1. Anderson, T.W. and S.M. Samuels (1967). Some inequalities among binomial and Poisson Probabilities. (to appear) Symposium on Mathematical Statistics and Probability. Univ. of California Press, Berkeley, California.
- 2. Barlow, R.E. and S.S. Gupta (1966). Nonparametric life test sampling plans. Technometrics, 8, 591-613.
- 3. Chow, Y.3., S. Moriguti, H. Robbins and S.M. Samuels (1964). Optimal selection based on relative rank (the "secretary problem"). <u>Israel Journal of Mathematics</u>, 2, 81-90.
- 4. Deely, John J. (1965). Multiple decision procedures from an empirical Bayes approach. (Ph.D. thesis). Miseograph Series No. 45, Dept. of Statistics, Purdue University.
- Deely, John J. and S.S. Gupta (1965). On the properties of subset selection procedures. Mimeograph Series No. 49, Dept. of Statistics, Purdue University. Submitted for publication.
- 6. Deely, John J. (1966). Sequential selection of the best of k populations. Mimeograph Series No. 91, Dept. of Statistics, Purdue University. Submitted for publication.

- 15. Cupta, S.S., A.S. Qureishi, and B.K. Shah (1967). Best linear unbiased estimators of the parameters of the logistic distribution using order statistics. (to appear) <u>Technometrics</u>.
- 16. Gupta, S.S. and W.J. Studden (1967). On some selection and ranking procedures with applications to multivariate populations. (to appear) S.N. Roy Memorial Volume, (Ed. R.C. Bose), Univ. of North Carolina Press.
- 17. Gupta, S.S. and Klaus Nagel (1966). On selection and ranking procedures and order statistics from the multinomial distribution. Mimeograph Series No. 77, Bept. of Statistics, Purdue University. Accepted for publication in Sankhya.
- 18. Gupta, S.S. and W.J. Studden (1966). Some aspects of selection and ranking procedures with applications. Mimeograph Series No. 81, Dept. of Statistics. Purdue University.
- 19. Holmes, Paul T. (1966). Semi-regular functions in Markov chains. Mimeograph Series No. 62, (Ph.D. thesis), Dept. of Statistics, Purdue University.
- 20. Nagel, Klaus (1966). On selecting a subset containing the best of several discrete distributions. Mimeograph Series No. 66, Dept. of Statistics, Purdue University. Submitted for publication.
- 21. Sansiels, S.M. (1965). On the number of successes in independent trials.

  Ann. Math. Statist., 36, 1272-1278.
- 22. Samuels, S.M. (1966). On a Chebyshev-type inequality for sums of independent random variables. Ann. Math. Statist., 37, 248-259.
- 23. Samuels, S.M. (1966). Randomized rules for the two-armed bandit with finite memory. Mineograph Series No. 71, Dept. of Statistics, Purdue University, Submitted for publication.
- 24. Shah, B.K. (1966). On the bivariate moments of order statistics from a logistic distribution and applications. Ann. Math. Statist., 37, 1002-1010.
- 25. Studden, W. J. (1966). On selecting a subset of k populations containing the best. Mimeograph Series No. 89, Dept. of Statistics, Purdue University, Submitted for publication.

## Papers and Talks Presented at the Various Professional Meetings

- 1. Invited paper on the Selection and ranking procedures and order statistics for the binomial distribution presented at the International Symposium on Classical Contagious and Discrete Distributions, held at McGill University, Montreal, Canada, August, 1963. (See No. 7 in the list).
- 2. Invited paper On the distribution of linear functions and ratios of linear functions of ordered correlated random variables (joint with K.C.S. Pillai and G.P. Steck) at the annual meetings of the American Statistical Association, Cleveland, Ohio, September, 1963. (See No. 8 in the list).
- 3. Contributed paper on the <u>Estimation of the parameters of the logistic</u>
  <u>distribution</u> (joint with Gnamadesikan) at the <u>DMS</u> regional meeting in Manhattan,
  Kansas, May 1964. (See No. 13 in the list).
- 4. Invited paper on <u>Some multiple decision (selection and ranking) rules</u>, at the joint European meetings of the IASPS, DMS and the Biometric Society, Beru, Switzerland, September 1964. (See No. 12 in the list).
- 5. Invited paper on <u>Some selection and ranking procedures for multivariate</u> normal populations using distance functions at the International Symposium on Multivariate Analysis, held at Dayton, Ohio, June, 1965. (See No. 14 in the attached list).
- 6. Invited talk based on the paper <u>Best linear unbiased estimators of the parameters of the logistic distribution using order statistics</u>, (joint with Qureishi and Shah) at the annual meetings of the ASA and DMS, Philadelphia, Sept. 1965. (See No. 15 in the list).
- 7. Invited talk on the joint paper with Deely On the properties of subset selection procedures at the annual meetings of the ASA and the IMS at Philadelphia, Sept. 1965. (See No. 5 in the list).

一日本、年、是

- 8. Invited paper On some selection and ranking problems at the Annual Army Research Conference on Design at Newark, N.J., October 1965.
- 9. Invited paper on Some selection and ranking procedures with application to multivariate populations (joint with W.J. Studden) at the IMS Regional meeting in Lafayette, Indiana, March 1966. (See No. 16 in the list).
- 10. Invited paper on Selection procedures for multivariate normal populations in terms of measures of dispersion (joint with M. Gnanadesikan) at the Annual DE and AMS meetings at Rutgers, New Brunswick, N.J., September 1966.
  - 1, 4, 5, 6, 8, 9 presented by Gupta
  - 2 presented by co-author Pillai
  - 7 presented by co-author Deely
  - 10 presented by co-author Gnanadesikan

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |       |      |        |      |       |  |

#### INSTRUCTIONS

- 1. ORIGINATING ACTIVITY: Enter the name and address of the contractor, subconfractor, grantes, Department of Defence activity or either organization (composate mulhor) issuing the report.
- 2s. REPORT SECURITY CLASSIFICATION: Enter the overall security classification of the report. Indicate whether "Restricted Data" is included. Marking is to be in accordance with appropriate security regulations.
- 2b. GROUP: Automatic downgrading is specified in DoD Directive \$2.0.10 and Armed Forces Industrial Manual. Enter the group smber. Also, when applicable, show that optional markings have been used for Group 3 and Group 4 as authorized.
- 3. REPORT TITLE: Enter the complete report title in all capital letters. Titles in all cases should be unclassified. If a meaningful title cannot be selected without classification, show title classification in all capitals in parenthesis immediately following the title.
- 4. DESCRIPTIVE NOTES: if appropriate, enter the type of report, e.g., interim, progress, summary, annual, or final. Give the inclusive dates when a specific reporting period is
- 5. AUTHOR(5): Enter the name(s) of author(s) as shown on or in the report. Enter test name, first name, middle initial. If military, show rank and branch of services. The name of the principal subtor is an absolute minimum requirement.
- REPORT DATE: Enter the date of the report as day, month, year, or month, year. If more than one date appears on the report, use date of publication.
- 7a. TOTAL NUMBER OF PAGES: The total page count should follow normal pagination procedures, i.s., enter the number of pages containing information.
- 76. NUMBER OF REFERENCES. Enter the total number of references cited in the report.
- 8a. CONTRACT OR GRANT NUMBER: If appropriate, enter the applicable number of the contract or grant under which the report was written.
- 83, 8c. & 8d. PROJECT NUMBER: Enter the appropriate military department identification, such as project number, subproject minher, system numbers, task number, etc.
- 92. ORIGINATOR'S REPORT NUMBER(S): Enter the official report number by which the document will be identified and controlled by the originating activity. This number must be unique to this report.
- 95. OTHER REPORT NUMBER(S): If the report has been assigned any other report numbers (either by the originator or by the sponsor), also enter this number(s).
- 10. JUAILABILITY/LIMITATION NOTICES: Enter any limitations on further dissemination of the report, other than those

imposed by security classification, using stendard statements such as:

- (1) "Qualified requesters may obtain copies of this report from DDC."
- (2) "Poreign announcement and dissemination of this report by DDC is not authorized."
- (3) "U. S. Government agencies may obtain copies of this report directly from DDC. Other qualified DDC users shall request through
- (4) "U. S. military agencies may obtain copies of this report directly from DDC. Other qualified users shall request through
- (5) "All distribution of this report is controlled. Qualified DDC users shall request through

If the report has been furnished to the Office of Technical Services, Department of Commerce, for sale to the public, indicate this fact and enter the price, if known.

- 11. SUPPLEMENTARY NOTES: Use for additional explana-
- 12. SPONSORING MILITARY ACTIVITY: Emer the name of the departmental project office or laboratory sponsoring (paying for) the research and development. Include address.
- 13. ABSTRACT: Enter an abstract giving a brief and factual summary of the document indicative of the report, even though it may also appear elsewhere in the body of the technical report. If additional space is required, a continuation sheet shall be attached.

It is highly desirable that the abstract of classified reports be unclassified. Each paragraph of the abstract shall end with an indication of the military security classification of the information in the paragraph, represented as (TS), (S), (C), or (U).

There is no limitation on the length of the abstract. However, the suggested length is from 150 to 225 words.

14. KEY WORDS: Key words are technically meaningful terms or short phrases that characterize a report and may be used as index entires for cataloging the report. Key words must be selected so that no security classification is required. Identifiers, such as equipment model designation, trade name, military project code name, geographic location, may be used as key words but will be follower by an indication of technical context. The assignment of links, rules, and weights is optional.

Security Classification
